Dr. Megha Sundara  
University of California Los Angeles  
Language Acquisition Lab

March 28, 2022

Dear Dr. Sundara,

I am excited to apply to your lab coordinator position.

I have research experience working with young adults in academia. I also have experience working with infants and toddlers in a clinical setting when I served as a medical assistant. Additionally, I volunteered at Children's Hospital where I helped entertain children who were under long term care.

My research interests involve language learners' phonetic perception as well as the neural basis underlying phonological and semantic mapping.

My coding experience includes performing statistical analysis and data visualizations with R and Python as well as interactive animations with JavaScript.

I would like to make use of my background in phonetics and programming to contribute to your work concerning language acquisition.

Thank you in advance for considering my inquiry and I look forward to hearing from you.

Sincerely,

Ruben A. Sanchez
